## ADVANCED INTESTINAL BARRIER ASSESSMENT: PROFILE 5150 (PLASMA)

### DAO (Diamine Oxidase)

### Zonulin

### Histamine

### DAO: Histamine Ratio

A high DAO-to-Histamine ratio suggests that there is sufficient DAO present to degrade any free histamine. A low ratio, on the other hand, may be indicative of histamine intolerance. The lower the ratio, and particularly the closer it gets to 1, the stronger that indication.

# SAMPLE REPORT

This test was developed and its performance characteristics determined by Dunwoody Labs or third-party reference affiliates. FDA clearance is not currently required for clinical use. Results are not intended to be used as the sole means for clinical diagnosis. Clinical correlation is required.  
Analysis performed by Dunwoody Labs  
Clinical Laboratory Director: Dr. D. Lee Scott, Jr.
